	Semester 1						Semester 2														
Week	1	2	3	4	5	6	7	8	9	10	11	Break	12	Exams	1	2	3	4	5	6	7
Technical research																					
Technical learning + understanding																					
Gathering training data for machine learning																					
Report: Intro																					
Jan Deliverable																					
Test deep learning models on new data																					
Optimizing models																					
Report: Technical																					
Additional functionality																					
Train models on new functionality																					
Report: Evaluation + Performance																					
Project submission																					

Break	8	9
